

# 3rd Grade Weekly Communicator-- Oct. 25-28

## Reading:

We will read a story closely and determine the gist (main idea). We will practice building stamina as we read and set a reading goal.

What is stamina? What is your reading goal?

## Writing:

We will practice using descriptive words to show our readers details instead of just telling them. We will write a journal entry from a character's point of view.

What was Trisha's point of view on school in *Thank you, Mr. Falker*?

## Math:

We will solve word problems using metric measurements including grams, kilograms, liters, and milliliters.

Have you child find objects around the house and estimate their mass (weight) in grams or kilograms.

## Science:

We will explore mixtures. We will determine what happens when two solids are mixed or a solid and a liquid are mixed.

What is a mixture? How do you separate mixtures?

## Social Studies:

We will define a region, and locate the 5 regions of the United States.  
What region of the United States do we live in? How is it different than the other regions?
